## CALENDAR

---

### SUMMER TERM.

Entrance examination.....Wednesday, June 7, 1911  
Class work begins.....Wednesday, June 7, 1911  
Second  $\frac{1}{2}$  begins.....Tuesday noon, July 18, 1911  
Term ends .....Friday, Aug. 25, 1911

### FALL TERM.

Entrance examination, etc.....Tuesday, Sept. 5, 1911  
Registration.....Wednesday, Sept. 6, 1911  
Class work begins.....Thursday, Sept. 7, 1911  
Fall term ends at 10:10 a. m.....Wednesday, Nov. 22, 1911

### WINTER TERM.

Class work begins.....Tuesday, Nov. 28, 1911  
Holiday vacation begins at 10:10.....Friday, Dec. 22, 1911  
School reopens .....Wednesday, Jan. 3, 1912  
Winter term ends.....Friday, March 1, 1912

### SPRING TERM.

Class work begins.....Monday, March 4, 1912  
Easter vacation begins at 10:10 a. m.....Wednesday, April 3, 1912  
School reopens.....Tuesday, April 9, 1912  
Spring term ends.....Wednesday, May 29, 1912

## **CIRCULAR**

---

### **THE PURPOSE OF THE SCHOOL.**

( The aim of this school is to qualify young people for the teaching service of the State of Minnesota. To the extent that the purpose of an organization determines its character, all the work of the school is professional. It does not give general culture for its own sake. It does not aim to prepare young men and women for college nor for the general pursuits of life. The school does not give general culture. Those who complete its full course, are given two years' credit at the State University. Professional work upon the common school branches and other subjects includes a preparation for business. The moral education which qualifies young men and women to be safe guides for the state's children is a good preparation for "complete living," and is beneficial in all walks of life. These results, however, though actual and abundant, are incidental to the primary purpose of the school. )

The constantly increasing demand for better schools gives rise to an urgent demand for more teachers who have received adequate training and preparation for their work. It is the special function of the Normal School to supply this demand. )

### **ENTRANCE REQUIREMENTS.**

1. A second grade certificate, or credits admitting to a high school course or the equivalent, will admit a student without examination.

Examinations will be held on the first day, for those who do not have the necessary credentials.

Students must pass examination in the subjects of Arithmetic, Grammar, Geography and United States History. They are expected to have a thorough knowledge of the subjects named as presented in the larger editions of the current leading modern text books.

In Reading, they are to show ability to read at sight, intelligently and fluently, ordinary, easy prose and simple poetry; and in Composition the ability to write a simple essay correctly and in proper form.

2. High school Graduates should present the diploma from a four years' high school course and high school standings. For the full course, this is all that is necessary.

For an elementary diploma at the end of one year, High School Graduates should present standings in Botany or Zoology, Chemistry or Physics, Civics and United States History studied in the high school. If these standings are not included in the credits presented the student will be conditioned, and must take them in the normal school in addition to the subjects of his course.

3. High school graduates who shall have taken, as post graduate work, at least a half-year's work in Normal subjects as offered in state high schools, may receive credit for subjects in which they shall have done a full semester's work; provided (1) that these credits apply only on the two years' graduate course; (2) that the president reserves the right to test the quality of the work, and (3) that the maximum amount of credit given shall be limited to one-half year.

4. A first grade certificate valid at the time of presentation, entitles its holder to twelve credits on the course; provided (1) that the subjects to be credited, shall be designated by the president, and (2) that the average of the certificate is not less than 75 per cent and that subjects in which the standings are less than 75 per cent are not credited, and that the number of credits allowed be proportionately reduced.

**THE COURSE OF STUDY FOR MINNESOTA NORMAL SCHOOLS****(Adopted Sept. 18, 1908.)**

For detailed information respecting the subjects, the reader is referred to the Synopsis of the Course of Study which appears on subsequent pages.

Algebra, I, II, III.	History, U. S., I, II, III.
Arithmetic, I, II, III.	History, General, I, II, III.
Botany, I, II.	History, English, I.
Chemistry, I, II.	Latin, I XI.
Civics, I, II, III.	Literature, I, II, III, IV.
Drawing, I, II, III.	Manual Training, I, II, III.
Education.	Music, I, II, III.
History of, I, II.	Physics, I, II, III.
Theory of, I, II.	Physiography, I.
Practice of, I, II, III.	Physiology, I.
School Management, ½	Psychology, I, II.
Elem. Science, I.	Reading and Expres'n, I, II, III, IV.

		Physiography

Note—For elementary diploma subjects marked \* must be substituted in first year.

## LEGAL FORCE OF DIPLOMAS

---

Act of Legislature, April 21, 1909.

"Diplomas issued to graduates of the State Normal Schools\*\*\*\* shall be valid as first grade certificates for two years from their date, and at the expiration of two years of actual, successful teaching such diplomas, endorsed by the president of the school granting them, and the state superintendent, shall have force of first grade certificates for life.

"Elementary diplomas granted by a State Normal school upon the completion of such portion of the course of study as may be prescribed therefor by the Normal School Board shall be valid as first grade certificates for a period of three years from their date, and shall not be renewable; except that any holder of such an elementary diploma may have the force and effect thereof, as such first grade certificate, extended for a further period of three years by the completion of an additional one year of work in a Minnesota State Normal school, and the certificate of indorsement thereon by the president of such school and the state superintendent; provided, that the provisions of this section shall not apply to persons now holding Minnesota elementary Normal school diplomas nor to any student heretofore enrolled in a Minnesota State Normal school who shall be graduated prior to September 1, 1911.

"The holders of certificates from the State Normal schools showing the completion of two years of prescribed work in such schools shall be entitled to have such certificates endorsed by the superintendent of public instruction and thereby given the full force and effect of a second grade certificate."

### Conditions of Endorsement.

1. While it is hoped that all graduates will earn the right to have their diplomas endorsed, great care will be taken in this matter, and the indorsement will not be granted in any case in which the holder fails to render acceptable service during the test period, or in any way fails to show himself worthy of the marked professional recognition and honor so bestowed.

2. After the completion of two years of service, application for indorsement may be made to the respective Normal Schools, upon blanks furnished for that purpose. The applicant should make a complete report of teaching done since graduation, and

should give the names and addreses of the supervising school authorities under whom the work was done, and to whom blanks may be sent upon which to give their testimonials as to the quality of the service rendered. When such testimonials have been received, if they are approved by the Board of Presidents of Normal Schools, a certificate of indorsement will be sent to the applicant.

### **THE VALUE OF COMPLETING THE FULL COURSE.**

Aside from the culture gained, the following advantages result from completing the full course:

1. It insures a life certificate in this state, after two years' of successful teaching, while diplomas for part work cannot be endorsed.

2. The diploma of the full course is the only one honored in most other states.

3. High school graduates who have many conditions to make up, must stay four terms to gain an elementary diploma, while six terms would bring the advanced.

4. Students who have had two years or more of work in high schools without graduation, cannot obtain the elementary three years' diploma without remaining two years or more in the Normal school. They often have, however, enough advanced credits to give them the diploma of the full course, if they remain but one year longer, or three years.

The University of Minnesota on April 26, 1911, made the following ruling: That a graduate from a four-year high school, who shall have completed the full two years' course in a Minnesota state normal school and shall be recommended by the president of the normal school from which he has graduated, shall be granted in the University a sufficient number of credits so that the four years' course, leading to the degree of B. A. in Education, may be completed in two years.

### **SESSIONS OF THE SCHOOL.**

There are five daily sessions of the school each week, from 8:30 a. m. to 4:00 p. m.

The evening hours of study are from 7:00 to 9:00 o'clock p. m., daily, except on Friday and Saturday evenings. This arrangement divides the day into two periods; that from 8:30 a. m. to 4:00 p. m., during which time the students are engaged principally in recitations, and that covered by the study hours in the evening. The strict observance of the latter period is of quite as much import-

ance as the former. No pupil will be expected to absent himself from duty during either interval, nor will it be presumed that pupils are to be interrupted by callers or visitors during their study hours, any more than during the hours of recitation. As the spirit of the school is thoroughly loyal to this plan, any person feeling himself unable to comply cheerfully with these habits of work will not find the school congenial.

### **ADMISSION.**

1. Students whose health is not good, should not attempt to enter upon a Normal School course. A person with any physical defects, should select any occupation rather than that of a teacher.

2. A teacher must be able to use clear and correct language both oral and written. Students who fail in this respect, will be required to take English composition even though they have passing standings in the subject given here or elsewhere.

3. Students must sign a pledge to teach two years in the schools of the state, unless prevented by circumstances beyond their control, and to report semi-annually to the President.

4. Graduates of high schools and colleges will be passed in subjects other than professional, without examination, on the certificate of the Principal that they have already completed these subjects with a grade of not less than 75 per cent.

5. Term credits will be given to those taking the full course, for post graduate normal review work done in the State High schools, provided that such standings from High Schools represent a full semester's work. The Normal faculty reserves the right to test the scope of such review work. Maximum amount of credit allowed for such work done in High Schools limited to one-half year's work.

6. Students will not be received after the beginning of a term except upon the most satisfactory excuse. Any who cannot be present upon the first day of the term should report to the President beforehand, that their absence may be understood. It is not expected that students will leave before the close of the term unless compelled to do so by circumstances beyond their control.

7. Students already entered in classes, and having no examinations to pass, are not required to be present the day of examination. Such students should inform the President of their intentions a few days before the term is opened. They should also report at the President's office on the day before class work begins, to be classified, and to arrange their program of work for the

term. Students who wish to be assigned to practice work should report the day before the regular work of the term begins.

8. Students arranging their programs should remember that psychology, general methods and practice must not be taken simultaneously, but must follow in sequence taking not less than three terms.

### **SUGGESTIONS TO APPLICANTS.**

Obtain a letter from your County Superintendent, if possible, introducing you to some member of the faculty of the school. This will be all the recommendation you will need.

Bring with you your credits, diploma, certificates from High school board, state teachers' certificates and all standings beyond the eighth grade. The school furnishes a blank on which such standings may be entered.

Students will be transferred from one State Normal school to another, only upon written permission granted by the President of the State Normal Board.

Credits for University work, or work in other colleges or Normal schools will be given on our course, but a minimum of one year's resident work will in all cases be required for graduation.

Students must come fully prepared to give their undivided attention to the work of the school during the entire term. The demands of the school are so pressing that the students cannot be permitted to engage during the term in any employment or pleasure—as taking private music lessons, or attending parties or entertainments—which is not directly connected with their work.

### **LIBRARY.**

A library of several thousand volumes is open to the school. A full supply of the standard reference books, dictionaries, encyclopaedias, gazeteers, etc., furnish all needed information upon subjects discussed in the classroom.

A library of text books upon all topics is open to the students, where they can find help in examining the various methods presented by our standard text-book authors in the different branches.

This school has been designated as a depository of public documents, and now has on its shelves over 3,000 volumes from the government printing office, many of them of great value. They are open to the public for consultation at any time during the day from 8:30 a. m. to 4:30 p. m.

### READING ROOM.

The reading room contains a large list of the leading newspapers, magazines and educational periodicals.

Both the reading room and library are open daily to students during the hours of the day when they are not required to attend to the other duties of the school.

### LITERARY SOCIETIES.

The Normal Literary Societies furnish excellent opportunities for social and literary culture, and all students are advised to become active members.

### BOARDING.

#### GENERAL REGULATIONS.

Particular attention is called to the following points:

1. Students who do not board at home are expected to consult the President before selecting boarding places.
2. Ladies and gentlemen will not be permitted to board in the same family. This rule shall apply equally where the house is occupied by two or more families.
3. Permission must be obtained in every case where pupils desire to board with families where boarders are taken who are not connected with the school.
4. Brothers and sisters will be allowed to board in the same house provided no other boarders are received into the house.
5. Students will not be expected to change their boarding places without consulting the President.
6. When students engage a boarding place, it will be understood that they are to remain in that place until the end of the current term, unless a specific bargain to the contrary is made.
7. Every means will be taken to secure suitable boarding places for such students as desire this service, and families in which students board will be encouraged to report the least departure from perfectly ladylike and gentlemanly conduct.
8. Pupils are not expected to receive calls during study hours.

### LAWRENCE HALL.

The dormitory known as Lawrence Hall is an invaluable adjunct to the school. The nearness of the hall to the school makes it peculiarly desirable during the winter months, saving a long walk through the cold and snow.

The hall is furnished with electric lights throughout and supplied with every convenience of the best modern homes. Large bath rooms, supplied with hot and cold water, are located on each floor.

The comfort and convenience of young ladies at the hall has been made a matter of long and careful study, and it can be confidently said that it affords to those so fortunate as to live there all pleasures of a home with none of the discomforts of a boarding house. The house is furnished throughout with new and substantial furniture.

Rooms for students are supplied with table, chairs, rugs, two bedsteads, springs, mattress, pillows, bureau, commode, washbowl and pitcher, window shades, napkins, towels, pillow cases, sheets, two blankets, comfortables, and spreads, and every room has two closets. Each young lady is requested to bring a waterproof cloak, umbrella and a pair of rubbers.

Students boarding at the hall are required to do no work under the present management, excepting that they take turns in waiting upon the table.

The supervision of the establishment is in the hands of a competent matron who devotes her entire time and attention to securing the physical and social comfort of the young ladies.

Such rates of boarding as this school affords, it is firmly believed, cannot be excelled by any other school in the country.

The price per week, including furnished room, light, fuel, board, use of laundry, bath rooms and all the conveniences of the hall, is three dollars and twenty-five cents (\$3.25)—payable monthly in advance. The price per week is four dollars (\$4.00) if one person occupies a room alone. Table board without room is two dollars and fifty cents (\$2.50) per week.

While most of the washing is done by steam laundries in the city, a limited amount may be done by the young ladies in the hall laundry. All the ironing may be done by the students if they so desire.

**Preference in choice of rooms will be given in the order of application.** Rooms are engaged by the term. Those wishing to occupy them for a shorter time should notify the matron of the fact at the time of engaging them.

Board can be secured in private families at from \$3.25 to \$4.00 per week.

#### **TUITION.**

Tuition is free to all students who enter the Normal department and sign the required pledge to teach two years in the public schools of the state.

LAWRENCE HALL

Kirt 06

DINING ROOM, LAWRENCE HALL

To all not so pledged to teach, the tuition is \$10 per term.

All tuition is payable by terms, **strictly** in advance, and no portion of the amount will be refunded.

### **TEXT BOOKS.**

Text-books are furnished free of charge to all who pay tuition; other students pay a uniform fee of \$1.50 per term for the rental of all text-books needed.

In the Model School the charge for book rent varies from twenty cents per term in the second grade to eighty cents per term in the eighth grade.

A strict account is kept of any injury done to books and a charge made therefor.

Students are allowed to purchase their books if they prefer to do so. To these students, books are sold at the lowest wholesale rates.

### **HOW TO REACH THE SCHOOL.**

If south of St. Paul or Minneapolis, buy your ticket to either one of these cities, and there purchase over the Great Northern or Northern Pacific road, a ticket to St. Cloud. Upon reaching the station take an omnibus and tell the driver to take you to the Normal School. Upon arriving, report to the President at his office.

### **ORCHESTRA.**

An orchestra is maintained in connection with the music department.

It is desired that those who play instruments should bring them from home. Opportunity will be offered to join the orchestra early in the year.

### **GENERAL REMARKS.**

It is to be hoped that County and City Superintendents, Principals, Teachers and other friends of the Normal School will be ready to advise those who are earnestly striving to make themselves good teachers, to enter some department of the school.

School Superintendents and all other friends of education are earnestly invited to visit and inspect the workings of this school, and by their criticism, suggestion and co-operation, aid us in supplying the schools of the state with better-trained teachers.

Address letters of inquiry and requests for catalogues to the  
PRESIDENT, State Normal School,  
St. Cloud, Minn.

## **SUBJECTS OF THE COURSE**

---

### **METHOD.**

One term is devoted to the general principles of teaching, observation of lessons, and lesson planning. A second term is given specifically to primary work, or advanced work, as the student may elect.

### **PRACTICE.**

Students spend 24 weeks in practice, one hour per day. They teach in this time four different classes, in four different subjects six weeks each. One of these classes is an entire grade in the city schools of St. Cloud.

### **PSYCHOLOGY.**

During the first term of psychology, the student is lead to observe the workings of his own mind, and to become acquainted with the language of the subject.

During the second term, more analysis is attempted. Emotions are quite thoroughly studied with the basis of ethics.

The third term is devoted to child psychology.

### **ARITHMETIC.**

The holder of a second grade certificate, and the eighth grade graduate takes mensuration and common fractions the first term and decimal fractions and percentage the second term. High school graduates cover this entire field in one term. The amount of drill work which can be given varies according to the ability of the pupils. High school graduates need much less time for drill.

### **ALGEBRA.**

Students take algebra throughout the second year. What is usually regarded as elementary algebra including the fundamental processes, fractions, unknown quantities, and radicals comprises the work of the first two terms. Higher algebra including quadratics and progressions forms the work of the third term. Numerous supplementary texts are used for drill in both exercises and problems.

**GEOMETRY.**

Plane geometry is taken the last two terms of the second year following about the same propositions for demonstration ordinarily found in text-books. The text used does not give the demonstrations but students are required to think out demonstrations from suggestions. Solid geometry is taken up in the same manner in the fourth year.

**LITERATURE.**

Course I.—(a) Mythology.—Stories from classic myths and legends told in class.

Texts.—Gayley's *Classic Myths, and Legends of King Arthur*. Read Tennyson's *Idylls of the King*, Lowell's *Vision of Sir Launfal*, and Longfellow's *Golden Legend*.

Course I.—(b) Shakespeare.—*Macbeth*, *Twelfth Night*, Dramatization of stories.

Course II.—(a) Milton to Tennyson. (b) The Novel—Ivanhoe, *Hypatia*, etc.

Course III.—(a) American Literature.—Rapid reading of poets from Bryant to Holmes. Careful study of Poe, Whitman and Lannier. Topics upon authors from Irving to Van Dyke. (b) The Essay, from Bacon to Emerson.

Course IV.—(a) Browning and Tennyson. (b) Chaucer, *The Folk Ballads*, and the *Iliad*.

Theme-writing in connection with each course.

**COMPOSITION.**

I. A review of capitalization and punctuation. Sentence structure.

II. Oral English. Short discussions for personal expression. Correction of common errors of speech.

III. Written English. Themes, at least once a week. Letter-writing.

IV. English Classics. Uniform selections for the study of form, vocabulary, style. Home reading, assigned according to the special needs of individuals.

**ENGLISH GRAMMAR.**

Aim: The first half of the course is given to the study of the sentence. The sentence is divided into its essential parts, modifiers, independent elements and connections.

During the second half of the course, parts of speech are studied as to classifications, inflections, and use.

### **LATIN.**

**1st year.**—Latin grammar. The text used is Hale's First Latin Book.

**2nd year.**—(a) Four books of Caesar's Gallic War; or, an equivalent amount from Miller and Beeson's Second Year Latin Book. (b) Latin composition based on the above, at least one period a week.

**3rd year.**—(a) Six of Cicero's orations. (b) Latin composition based on Cicero, one period a week.

**4th year.**—(a) Six books of Vergil's Aeneid. (b) Selections from Ovid.

In all four years a good deal of attention is paid to translating at sight.

### **HISTORY AND SOCIAL SCIENCE.**

**General History**—In which the emphasis is placed on modern history, as the period that comes in closest relation with our life today.

**English History**—In which the emphasis is placed on the development of popular self-government.

**American History**—In which we try to put the emphasis on organizing facts, not forgetting that teachers will find the story element especially useful in their own teaching.

**History of Education**—Which, besides being history, is used as a historical commentary on the science of teaching.

**Methods in History**—Is mainly a review of American history with the method of its teaching to children in view. In this course the pupils are also given the opportunity to get acquainted with classical historical literature for children.

**Civics, Elementary Course**—The principal object of this course is to give the pupil a working knowledge of our civic institutions. It is a sort of catechism in citizenship. The pupil is also introduced to the fundamental conceptions that underlie our civic life.

**Civics, Advanced Course**—Is a study of political (or civic) institutions and life with special reference to present-day problems.

**Social Science**—As taught here, is a study of the institutions of society, their evolution, and their present-day problems. Little attention is given to theory. The emphasis is placed on the study of live social problems.

### PHYSICS.

The work of the first term covers the subjects of physical properties of matter, laws of motion, force, work, simple machines—mechanics of solids and mechanics of fluids. The work of this term is made the basis of that which is to follow and must be taken before the work of either the second or the third term is attempted. The work of the second term, given in the winter term only, consists of a study of sound, magnetism, and electricity, while light and heat remain for the work of the third term. Either second or third term work may follow that of the first term.

Students must possess a good working knowledge of plane geometry and of elementary algebra through quadratics in order to do the work of the course intelligently.

### ELEMENTARY SCIENCE.

This is a course in applied science. The composition and structure of soils, water, air, vegetable and animal life are studied and the students are led to observe and understand what is going on in the world about them. The nature, cause and prevention of diseases of plants, animals and man receive some attention with special emphasis upon school sanitation and personal hygiene. To this end chemistry, physics, astronomy, botany, zoology, physiology, domestic science, agriculture and other sciences are drawn upon, and the relation of the facts of these sciences to organic life in general, and to the student's own life in particular, is made the subject matter of the course.

### BOTANY.

The instruction in this subject includes two recitations per week on plant organs and their functions, also eight hours per week in the laboratory studying plants as related to agriculture. In the spring and summer terms about two hours of the eight are spent in gardening. Each student attends to his own garden. Trees of the locality are studied, also many of the common shrubs and herbs. Attention is paid to weeds and their eradication. Considerable time is spent in the study of corn, wheat, oats, and other field crops. The course is twenty-four weeks in length.

### ZOOLOGY.

Two lessons per week are given over to leading zoological topics. The remaining eight hours are spent in the laboratory in

work pertaining to common domestic animals. Field excursions are taken to gain acquaintance with common animals of field, forest, pond and stream. Attention is given to insects and birds in their relation to agriculture, in order to know which are beneficial and which detrimental. The subject continues throughout two terms.

### **PHYSIOLOGY.**

The principal organs and systems of the human body are studied, not so much for the purpose of learning their gross and histological structure, as to gain a knowledge of the laws governing health and physical vigor. The school is well supplied with the usual appliances for teaching this subject. The course continues for twelve weeks and is supplemented by lectures given by physicians of the city.

### **MUSIC.**

In this department the aim is two-fold. First. To give instruction in the rudiments and the method of teaching music. Second. To afford the culture which is gained by continued singing and hearing good music.

In the rudiments of music, instruction is given in sight reading, musical construction in its various phases, ear training, interpretation, and voice culture.

An outline of methods in music, in which definite instructions for the teaching of music in all grades are laid down, is made by each student. Illustrative lessons are taught by student and instructor.

At chorus period daily and in special choruses standard compositions, choruses from the operas and oratorios are sung and students are trained in giving artistic interpretation and expression.

### **GEOGRAPHY.**

**Course 1. Physical Geography**—This course prepares one: (1) to see in the field and in the shops that which is essential to both political and commercial geography; (2) to recognize the great factors governing climate; (3) to express himself in good geographical language.

**Course 2. Commercial Geography**—(1) Type products with physical features which determine their location; (2) trade routes and trade centers.

**Geography Methods**—The work covers courses 1 and 2.

**Physiography**—(1) The origin of the physical features; (2) their adaptation to man.

### **DRAWING.**

This course includes free-hand drawing from nature and objects, also construction and design in the simplest forms. Pupils are taught to use all mediums suitable for public school work.

### **MANUAL ARTS COURSE.**

The following shop subjects require from 60 to 120 hours each per term of 12 weeks:

Mechanical Drawing, Architectural Drawing, Practice of Design, Woodwork I, II and III, Wood Burning and Pattern Making, Metal Work, Lettering and Printing, Bookbinding, Clay Modeling, Pottery, Weaving, Basketry, Cardboard Work, Paper Cutting, and Folding, Principles of Supervision and Methods.

### **DOMESTIC SCIENCE.**

The course in Domestic Science aims to make the student intelligent in the preparation of simple, wholesome food. The most important types of food are studied as to composition, digestibility and nutritive value. The principles underlying the cooking of these foods are determined by experimental work as far as practicable. Laboratory work is supplemented by lectures and reference work. During the course several meals are prepared and served as attractively as possible. The course requires one and one-half hours a day for one term.

The following courses, offering an additional year's work to the present standard course, were adopted by the State Normal Board on Feb. 14, 1911:

#### **Manual Training—**

In addition to the two years of the present course as stated:

3 units. Shop work.

3 units. Drawing.

2 units. Either drawing or manual training.

1 unit. Teaching.

1 unit. History and organization.

2 units. Electives.

Minimum, 8 technical units in one subject.

**Home Economics—**

In addition to the two years' course:

3 units. Cooking.

3 units. Household art.

1 unit. Chemistry and Bacteriology.

1 unit. Physiology and Hygiene.

1 unit. Teaching.

1 unit. Drawing and Design.

2 units. Electives.

Minimum, 10 units of Professional Work for diploma.

Condition of admission, Chemistry  $\frac{1}{2}$  year in high school or one term in normal school.

**PHYSICAL CULTURE.**

Activities: School exercises, Calisthenics, Light Gymnastics with hand apparatus such as Indian Clubs, Bar Bells, Dumb Bells, Figure Marching, Gymnastic Games, such as Racing Games, Tag Games, All Up Relay, Shuttle Relay, Pass Ball Relay. Such Folk Dances and Folk Singing Games as have proved most useful.

The Folk Dances taught are selected from lists officially approved by the American Playground Association as suitable for indoors and out of doors, for small children, for larger boys, for larger girls, for adults, for various occupations, for special occasions.

**ATHLETICS.**

The work in athletics has properly adjusted itself to the seasons, so that we now have football in the fall term, basketball in the winter term, and baseball in the spring term. In these games teams are trained to represent the institution and frequently make trips to other schools for the purpose of playing matched games. The department owns a full outfit of suits for these games and those who succeed in getting on the first team are supplied. Six tennis courts are now being built upon the campus. All students are eligible to play tennis and are given instruction in the art of the game. A tennis tournament is held during commencement week, in which the different classes are invited to participate. A silver cup is awarded to the winning class.

**GYMNASTICS.**

A large gymnasium, well equipped with light American apparatus and with Swedish and German stationary apparatus, affords

A RECITATION ROOM

CLASS IN MECHANICAL DRAWING

A VIEW IN THE DRAWING ROOM

A ROOM IN LAWRENCE HALL

every opportunity for indoor exercise. Large rooms fitted up with lockers, dressing rooms and shower baths provided for the students who take part in gymnastics, are a valuable addition to the former equipment. All students from the first grade up are required to take physical training two periods a week. Measurements are taken at the beginning and at the end of the course, and prescriptions of suitable exercises made out for those who are not able to take the regular work. The work of the first year Normal classes is as follows:

(a) Fall term. Elementary Swedish gymnastics, games, marching tactics, mat exercise and fancy steps.

(b) Winter term. Advanced Swedish gymnastics, games, tumbling, marching tactics and advanced fancy steps.

(c) Spring term. German gymnastics, advance marching tactics, theory of physical training with practical applications. This work is supplemented by the making of plans and the direction of classes in the training school.

#### **Special Courses for Supervisors of Music, Drawing and for Normal Instructors in State High Schools.**

The Normal schools have in contemplation the establishing of a special course for those who wish to become teachers of drawing, music, or supervisors of Normal training departments in state high schools. The State Normal Board has asked the Normal Presidents to outline such courses for consideration at its next meeting.

At the time of the preparation of this catalog, however, the courses have not been presented to or approved by the Board. This tentative announcement has been made for the benefit of those who are interested in the proposed work and it will be supplemented by detailed information on application to the President of the school.
